TOKENIZATION is used for storage of credit card information to a user's profile to speed checkout without compromising PCI compliance.

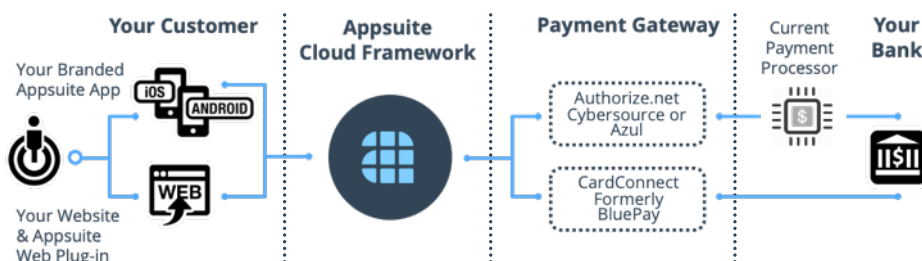

Payment Processing: OVERVIEW

Payment processing is a key part of the Appsuite cloud CRM program where credit card processing is required. Primary pathways for enablement of credit card processing are CardConnect (formerly BluePay)* within the USA and Canada and Cybersource or Authorize.net for USA and other global markets. Additionally, robust Appsuite APIs have allowed integration development with gateway provider Azul in the Dominican Republic. Custom additional payment integrations are available.**

Supported functions for the payment processing module include e-gift cards for electronically purchased and delivered gift cards; in-app and online takeout and delivery orders; and manual or auto-reloading of e-wallet functions for a convenient pay-at-the-counter feature. The solution is PCI compliant with credit card processing negotiated between consumer and processor. Neither Appsuite nor the merchant business is involved in handling any card data. Tokenization is used for storage of credit card information to a user's profile to speed checkout without compromising PCI compliance.

*BluePay and CardConnect are consolidated First Data companies and operate under the CardConnect brand. The CardConnect/BluePay Merchant Account is a full payment processor account that requires credit approval, PCI compliance obligations and contract terms.

**Custom additional payment integrations are paid engagements requiring 6-12 weeks to complete with assumption that the processor and/or gateway also have open APIs.

Pre-integration of the Appsuite solution to available global payment processing gateways make it a plug and play, PCI compliant means to enable critical online ordering and gift card/e-gift/e-wallet functions.

Payment Processing: *CardConnect*

[WEBSITE](#)**PART 2452169**

CardConnect/BluePay, a First Data company, is a leading provider of technology-enabled payment processing for merchants and suppliers of any size throughout the United States and Canada. Appsuite has integrated its cloud infrastructure with CardConnect's proprietary payment gateway. Payments go directly to your bank, and rates are very competitive. CardConnect is a resource for all payment processing needs, both online and in-store. Custom pricing is available.

Payment Processing: *AUTHORIZE.NET*

[WEBSITE](#)**PART 3121886**

Payment Processing: *CYBERSOURCE*

[WEBSITE](#)**PART 3324745**

Authorize.net and Cybersource connect mobile apps and websites to the payment processing networks through a payment gateway with the complex infrastructure and security necessary to ensure fast, reliable and secure transmission of transaction data. With hundreds of thousands of merchants worldwide, Authorize.net and Cybersource have been trusted names in e-commerce since the Internet's coming of age. Both pathways allow an organization to retain its current payment processor with full connectivity to all Appsuite e-commerce functions. Monthly subscription and transaction fees with Authorize.net and Cybersource do apply.

Payment Processing: *AZUL*

[WEBSITE](#)**PART 3331797**

Azul is the innovative, reliable payment affiliation brand of Popular Digital Services, a subsidiary of the Dominican Republic's leading financial organization, Grupo Popular. Appsuite has developed the pre-integration to this important gateway for payment processing in the region.
